

## **STANDARD INSTALLATION - Install JUMS 3.0 on a Stand-Alone Computer**

**All users:** The JUMS 3.0 program installation requires you to select your Unit UIC, Region, and Brigade from a list box. Please obtain this information prior to beginning the installation. Overseas units, please read Step 7b for additional instructions.

**All Windows 95 and NT 4.0 users:** Read supplemental instructions in Step 14 before installing the JUMS 3.0 program.

**For All Other Users:**

**Step 1: Close all programs and screen savers prior to installing the JUMS program from this CD.** Installing the JUMS program will reboot your PC at least once. Ensure server users connected to this PC are notified prior to beginning the installation.

**Step 2: Put the CD-ROM disk in the CD-ROM drive and auto-run begins.** If the CD-ROM does not auto-start, open My Computer, select your CD-ROM drive (normally the D:\drive), then select the file Setup.exe. Or click the Start button, select Run, type D:\setup.exe (where D: is the CD-ROM drive letter).

“Install” displays with “Copying Files, please stand by.” (THIS MAY TAKE SEVERAL MINUTES).

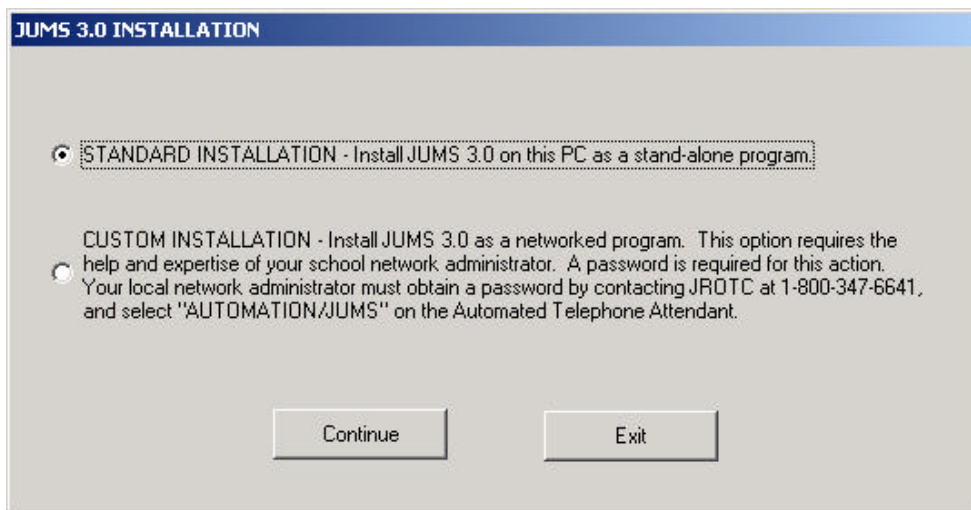

**Step 3: Select the “STANDARD INSTALLATION” Radio button and click “Continue”.**

STANDARD INSTALLATION - RADIO BUTTON

*“Install JUMS 3.0 on this PC as a stand-alone program”*

CUSTOM INSTALLATION - RADIO BUTTON

*“Install JUMS 3.0 as a networked program. This option requires the help and expertise of your school network administrator. A password is required for this action. Your local network administrator must obtain a password by contacting JROTC at 1-800-347-6641, and select “AUTOMATION/JUMS” on the Telephone Attendant”*

This JUMS program will automatically install the latest service pack for the version of Windows running on this PC.

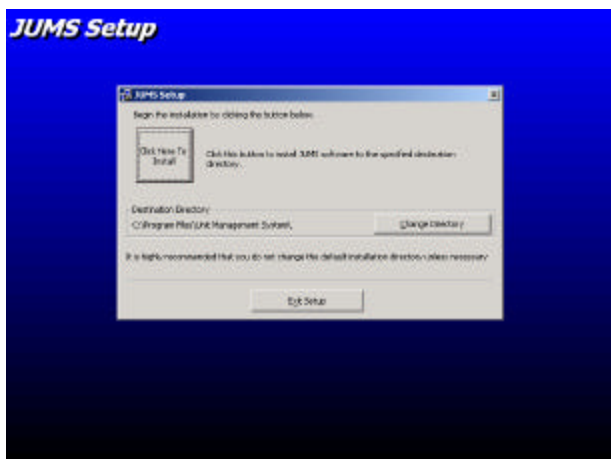

**Step 4: JUMS Setup.** Click the “Click Here To Install” button. “Click Here To Install” displays the following:

“Setup is checking for necessary disk space”

“Installing Data Access Components”

“JUMS Setup” shows status of copied files

If the following message appears during this process, Version Conflict: “A file being copied is not newer than the file currently on your system”, click the “YES” button to keep this file. You may get several of these prompts.

The “Change Directory” button allows you to install this program somewhere other than the default directory. It is highly recommended that you do NOT change the default installation directory unless necessary.

The “Exit Setup” button closes the program installation.

**Step 5: PC Reboots.** Your computer will reboot following file installation. You will also need to login to your computer. Following the PC reboot, MSDE begins to install. The MSDE installation may take several minutes.

“Install” displays with “Copying Files, please stand by.”

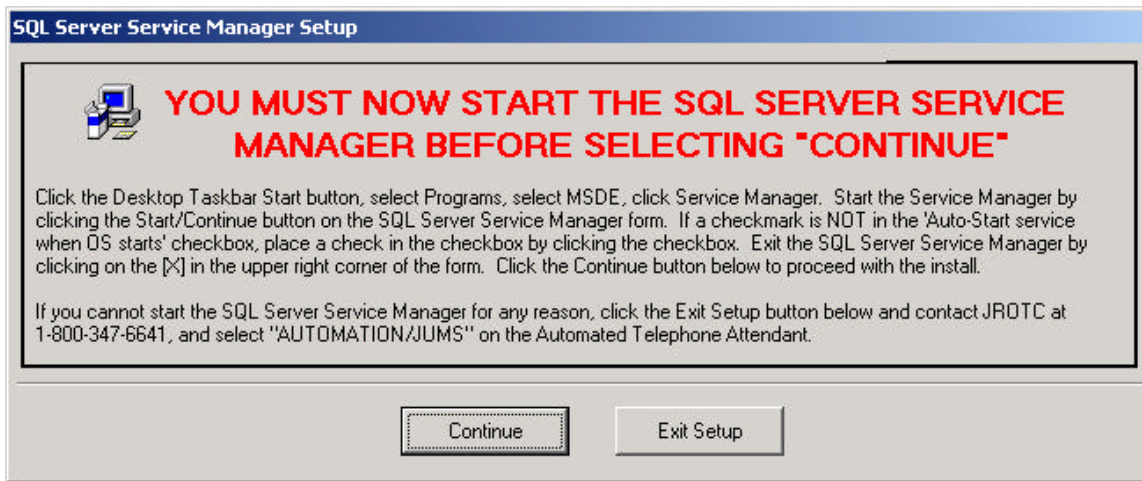

“Setup is creating program icons” displays.

**WARNING: DO NOT CLICK THE CONTINUE BUTTON WITHOUT FIRST COMPLETING STEP 6 BELOW.**

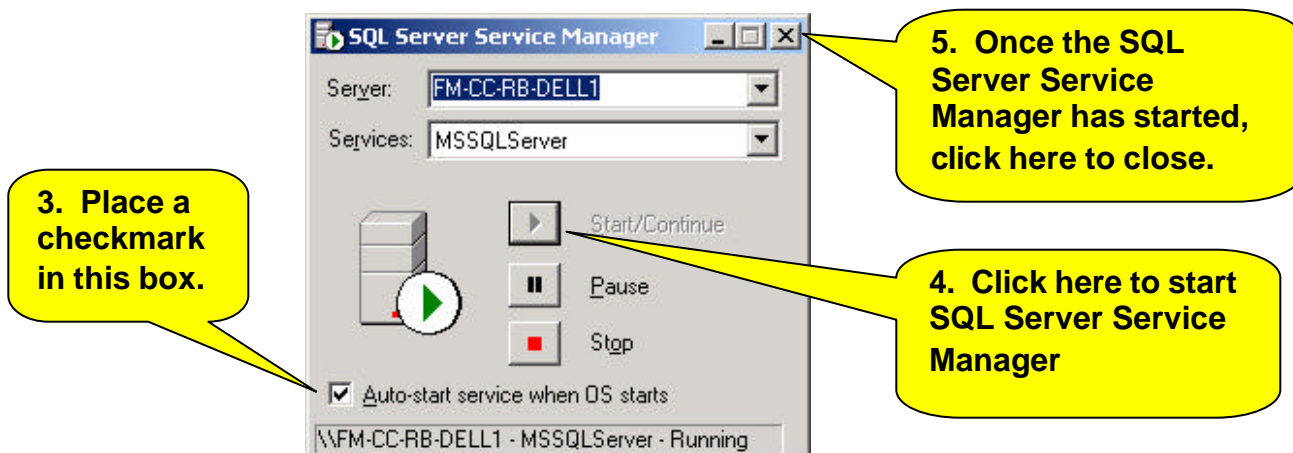

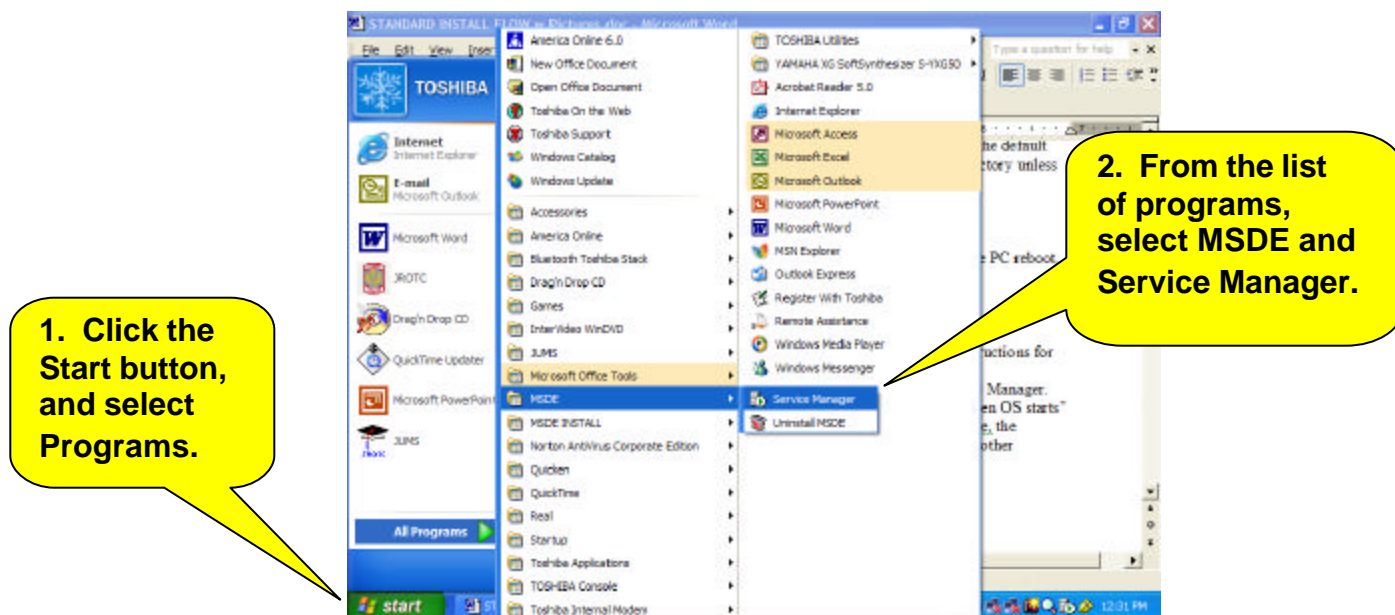

**Step 6: SQL Server Service Manager Setup.** “SQL Server Service Manager Setup” displays with instructions for starting the SQL Service Manager from the desktop Start button on the task bar.

Click the Desktop Taskbar, Start button, select Programs, select MSDE, click Service Manager. Start the Service Manager by clicking the Start/Continue button on the SQL Server Service Manager form. If a check mark is NOT in the ‘Auto-start service when OS starts’ checkbox, place a check in the checkbox by clicking the checkbox. Exit the SQL Server Service Manager by clicking on the [X] in the upper right corner of the form. Click the Continue button below to proceed with the install.

If the PC already has MSDE installed by some other application, this window will not display.

After setting up the SQL Server Service Manager and clicking continue, the "Attaching Databases" window appears.

## **Step 7: Unit UIC Selection.**

### **a. Instructions for U.S. Schools Only.**

Select Army from the Branch of Service list box.

Select your Region from the list box.

Select your Brigade from the list box.

Select your Unit from the list box.

Write down your UIC/School Code to compare them with the ones entered in JUMS 2.4. If you have data in JUMS 2.4 that you wish to convert to this program, the last 5 characters of the UIC in the System Setup of JUMS 2.4 has to match the UIC in this list box. In JUMS 2.4, the UIC without the “W “ and the school code must match the UIC and school code in the Unit list box to successfully convert your data to this program.

After selecting your Unit, click on the “Continue with the highlighted UIC” button. A validation window will appear for you to validate your selection.

“Unit UIC Selection Complete” displays with default logins and passwords. It is recommended that you write these logins and passwords down. The login *ADMINISTRATOR* allows access to the entire program. The login *ADMIN (DEFAULT)* allows access to only the admin portion of the program. The login *SUPPLY (DEFAULT)* allows access to only the supply portion of the program.

### **b. Instructions for Unit UIC Selection for Overseas Schools Only.**

Select Army from the Branch of Service list box.

All overseas schools select 99 in the Region list box.

Schools in Europe, select 01 in the Brigade list box, then select your Unit from the list box.

Schools in Korea, select 02 in the Brigade list box, then select your Unit from the list box.

Schools in Japan, select 03 in the Brigade list box, then select your Unit from the list box.

Write down your UIC/School Code to compare them with the ones entered in JUMS 2.4. If you have data in JUMS 2.4 that you wish to convert to this program, the last 5 characters of the UIC in the System Setup of JUMS 2.4 has to match the UIC in this list box. In JUMS 2.4, the UIC without the “W “ and the school code must match the UIC and school code in the Unit list box to successfully convert your data to this program.

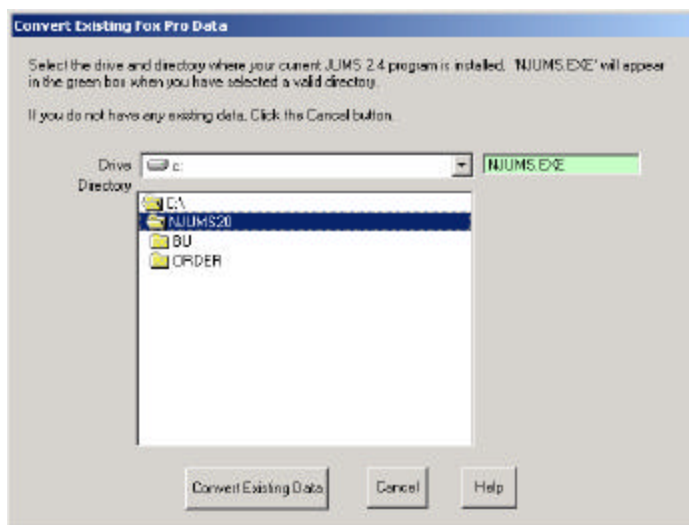

**Step 8. Unlisted Unit UIC.** If you cannot locate the correct unit name in the Unit list box, click the “Continue with an unlisted UIC” button. Contact JROTC at 1-800-347-6641, and select “AUTOMATION/JUMS” on the Telephone Attendant” for further instructions.

**Step 9: “Creating JUMS desktop shortcut” displays.** A JUMS-JROTC icon may appear on your desktop.

**Step 10: JUMS How To.** “Copy JUMS How To” displays with Yes/No buttons for saving to your C:\ drive. It is recommended that you select YES. The JUMS How To file requires at least 150 MB of free disk space on your hard drive. The JUMS How To can be copied from the CD-ROM at any time if you select “NO”. To access the JUMS How To on your hard drive, open your C:\ drive and double click the JUMS HOW TO folder, then double click on SlideShow.exe. If you receive the following message after clicking on SlideShow.exe: “A Java VM needs to be installed (or updated) before this program can be run. Would you like detailed help?” select “NO” to detailed help. Open the JUMS Army How To folder on the JUMS installation CD. Find the file msjvax86.exe, double click on this file, and follow the on-screen instructions. Once the installation has completed and your PC has rebooted, run the SlideShow.exe again.

**Step 11: Convert Existing Fox Pro Data.** If you clicked “Continue with Highlighted UIC”, the “Convert Existing Fox Pro Data” displays. Select the drive and directory containing your JUMS 2.4

data. The default directory is NJUMS20 located under the C:\ drive. Double click on NJUMS20 and NJUMS.EXE will appear in the box next to Drive. Click the “Convert Existing Data” button to convert. A validation screen will appear and your data converts. A Data Conversion Complete screen will appear with instructions for reviewing the C:\NJUMS20\ExceptionReport file for details of the conversion. Click “Cancel” if there is no JUMS 2.4 data to be converted, or if the data cannot be located. Clicking “Cancel” displays instructions for converting existing data at a later time.

**Step 12: JUMS 3.0 program installation is complete.** “JUMS SETUP” “*Installation Complete, please remove installation CD*” displays. Remove the CD and store this CD in a safe and accessible place. To access the JUMS 3.0 program, click on the JUMS-JROTC icon on your desktop, or click the Start button on your Taskbar, select Programs, select JUMS, and click on JUMS-JROTC.

**Step 13. Login User Name and Password.** Select ADMINISTRATOR from the drop down box for the User Name and type JUMS for the Password, then click the Log In button. If you converted data from JUMS 2.4, your previous user names and passwords will also be available to select.

**Step 14. For all Windows 95 and NT 4.0 Users. Supplemental Instructions:** Windows 95 users must install Internet Explorer 6 Service Pack 1 (includes Internet Explorer 6) before installing JUMS 3.0. Windows NT 4.0 users must install Internet Explorer 6 Service Pack 1 (includes Internet Explorer 6) AND Windows NT 4.0 Service Pack 6a before installing JUMS 3.0. Internet Explorer 6 Service Pack 1 and Windows NT 4.0 Service Pack 6a can be downloaded from the web at [www.microsoft.com/downloads](http://www.microsoft.com/downloads).

To download Internet Explorer 6 Service Pack 1, click on [Internet Explorer 6 Service Pack 1 \(Includes Internet Explorer 6\)](#) from the Most Popular Downloads list. Click on [Download](#) and follow the Instructions. To start the installation, click Open to run this program from its current location or click Save this program to a disk.

To download Windows NT 4.0 Service Pack 6a, select Windows NT in the Product/Technology list box under Search for a Download. Type Service Pack 6a in the Keywords box and click Go. Click on [Windows NT 4.0 Service Pack 6a](#), then click on [sp6i386.exe](#) from the Files in this Download located at the bottom of your screen and follow the Instructions. After completing these two downloads successfully, begin your JUMS 3.0 installation with Step 1 above.
